

**WATER AND SEWER UTILITY RATE STUDY
FOR
WATER & SEWER DIVISION**

REQUEST FOR PROPOSALS (No. 042-15)

Addendum No. 2

Special Instructions, Section 2.3, paragraph 1:

Q: *Because the RFP requires that “the rate structure review shall include the preparation of a ‘calibration model’ ... “, is the City requesting delivery of a cost of service rate model for its use?*

A: No. The expectation of a calibration model in the rate structure review process is considered necessary to demonstrate that the study’s methodology, i.e. rate model, has predictive reliability based on current data.
