Addendum II Questions and Answers for the Parks and Recreation Master Plan Bid #20-0312

The following is responses to questions to clarify the information regarding the Consulting Services: Parks & Recreation Comprehensive Master Plan RFP.

1. Question: Can you please define and give examples of a “natural resource facility” for Rome/Floyd Park System.
Answer: We manage a couple of wildlife areas for the Ga. Department of Natural Resources, one is DNR property on the Blacks Bluff and the other is Lock and Dam Park. Both are located on waterways one has a major swamp.
2. Question: Can you provide any addition guidance on the request for developing a “natural resource management plan”. This task can be tremendously encompassing or very limited in scope.
Answer: We would like them incorporated into the Master Plan as we would other park areas. The scope would be limited. We do not want a full management plan. The DNR has some regulations that need to be included and explained.
3. Question: For the task item: “Assessment of natural resource facilities ...compared to those in the region”. Can you define what is meant by “in the region”.
Answer: The region would be what is typically defined as Northwest Georgia.
